DESCRIPTION

The composition of Brass alloy CZ131 has been designed to provide a compromise between machinability and strength. Thus, it can be used in applications when machinability and riveting are required. CZ131 is a riveting and turning Brass with a duplex phase structure containing a fine dispersion of Lead particles to improve machinability. In addition the alloy offers a high general corrosion resistance combined with a good strength and ductility.

TYPICAL APPLICATION

Fasteners, Rivets, Domestic appliances, Automotive engineering
